All Transaction Authorisers can authorise own transactions (Single Control)

Risk Disclosure Statement

For all transactions made through DBS IDEAL, the system will have **Dual Control** in place such that no single person could create and approve transactions that would result in fraudulent actions. Please note that Customer Self Administrators cannot act without a **Dual Control**.

Dual Control

A procedure that involves two or more people to complete a transaction – one person to create a transaction and another of higher authority to approve it in the system. This makes the system more secure as both persons would need to be in collusion to commit fraud.

Single Control

A procedure that needs only one person to complete a transaction, thus may incur higher risk compared with **Dual Control**.
